EDUCATION

Courant Institute of Mathematical Sciences - New York University, NY, USA **Dec 2022(expected)**
Master of Science in Computer Science *GPA:3.89/4*
Manipal Institute of Technology, Manipal, India **July 2018**
Bachelors in Information and Communication Technology with a minor in Soft Computing *CGPA: 8.83/10*

SOFTWARE SKILLS AND COURSES

- Languages: C, C++, Java, Python, HTML, CSS, JavaScript, TypeScript | Database Management: SQL, MongoDB, Firebase
- Machine Learning and Data Processing: R, TensorFlow, Keras, NLTK, NumPy, pandas, Matplotlib, ELK
- Other Technologies: Node.js, Angular, React, Electron, Express, AWS Certified Developer, Git

PROFESSIONAL EXPERIENCE

Amazon, New York City, USA

Software Development Engineer Intern – AWS Connect **May 2022 – Aug 2022**

- Working to create personalized experiences for customers using omnichannel cloud contact center.
- AWS Identity and Access Management for Amazon Connect.

Samsung Semiconductor India R&D, Bengaluru, India

Senior Engineer - India Memory Solutions Team - Host Software **July 2018 – Dec 2020**

- Contributed to a C++ library called MSVP that enabled test script writers to carry out validation, quality checks, firmware testing, and spec compliance testing of Solid-state drives. This library is the single tool used worldwide across Samsung by 15+ teams to validate storage controllers and firmware developed for vendors like HPE and Dell for all market SSD products.
- Developed a cross-platform desktop GUI application using Electron and AngularJS which utilized the above C++ library.
- Architected a tool-agnostic framework to integrate drive performance analysis and benchmarking features in the above application using third-party tools like Iometer and FIO along with visualization of output data using the Chart.js library.
- Developed a client-side remote test execution utility using Electron and Node.js for executing test scripts via sockets and synchronizing and uploading logs to C++-based servers**.**
- Designed a fully scalable system of interconnected test machines responsible for SSD Validation using the MEAN stack, with the goal being large-scale analysis and management of test execution, test log collection, and result synchronization.

Student Intern - India Memory Solutions Team - Host Software **Jan 2018 – June 2018**

- Ported the MSVP C++ library from Windows to Linux to make it cross-platform, using the Boost library and a custom Operating System Agnostic Layer implementation. Optimized the library to reduce the script execution time by 10%.

Goldman Sachs, Bengaluru, India

Summer Analyst – Human Capital Management Technology **May 2017 – July 2017**

- Built a scheduling assistant and a meeting room booking web application, using Node.js, AngularJS, and Java.

ACADEMIC PROJECTS

Abstractive Text Summarisation using Transformers **New York University**

- Built a Transformer based model to generate the headlines from the news using the InShorts news dataset.
- Compared the performance and efficiency of Bi-LSTMs with Attention and Transformer-based Networks for this problem.

RepCRec – Replicated Concurrency Control and Recovery **New York University**

- Implemented a distributed database, complete with multi-version concurrency control, deadlock detection, replication, and failure recovery. Algorithms used: Available copies approach using strict two phase locking.

Performance Prediction of Multi-threaded Applications **New York University**

- Analyzed several regression models to predict the performance of multi-threaded applications where the performance measure is the speedup relative to single thread execution (Mean Average Error – 0.032).

RESEARCH AND PUBLICATIONS

- Mid Roll advertisement placement using Multi Modal Emotion Analysis. *ICANN 2019, Germany*
- Real Time prediction of American Sign Language using Convolutional Neural Networks. *ICACDS 2019, India*
- Comparative Analysis of Statistical Classifiers for predicting News Popularity on Social Web. *ICCCI 2019, India*
- Prediction of Factors Affecting Amlodipine Induced Pedal Edema and its classification. *ICACCI 2017, India*

LEADERSHIP AND AWARDS

- Graduate Teaching Assistant at New York University.
- Led a team of Student Interns at Samsung working on an ELK pipeline for efficient test log collection, analysis, and visualization.
- EOM and Spot Awards at Samsung for outstanding contribution towards Centralized Analysis and Management Platform.
